Cusco Gear oil

The Cusco gear oil contains hydride purified base oil. It keeps it good performance against the heat after long term use. Use for all mechanical LSDs. Developed by CUSCO, the most familiarized company with LSD. Minimise the noise and vibration, and maximise the performance. Purified base oil provides the higher performance against heat. With the specially developed Friction Modifier, the oil minimises the chattering noise and wear. So maximise the life of your LSD with Cusco oil.

LSD OIL 80W-140

For rear LSD which is exposed by high load and heat with high performance engine, tyre & suspension. Use for 4WD rear LSD & FR rear LSD. Also good for use in high temperature region and hot climates. Suitable for all mechanical LSD's.

**API / GL5
80W-140**

LSD OIL 80W-90

Good for use with the transmission of FWD or AWD vehicles with LSD. Multi-grade oil performs even under extremely high / low temperature. Suitable for all mechanical LSD, from daily use to competition use.

**API / GL5
80W-90**

Transmission 75W-85

Lubricates both LSD & Transmission

Contains hydride purified base oil. With its high quality base oil, Friction Modifier performs its best to make the synchronizer gear work the best. And surely lubricates under any situation. Friction Modifier saves the synchronizer gear being worn out during sport driving situations, and makes the gear change feel better. As its Friction Modifier works with the LSD, the oil can be used for FWD vehicles with LSDs in the transmission. It helps the performance and extend the life of both synchronizer gear and LSD. 75W-85 oil assures you an easy gear shift even at low temperatures. Very purified base oil provides the higher performance against heat.
